

DYNABINDER - Quick Patch Binder

DynaBinder is a high tensile strength, acrylic latex bonding agent. Dynabinder is formulated to patch new or existing asphalt and concrete surfaces.

DynaBinder can be mixed with Portland Cement and silica sand to create a slurry that is used to fill cracks and be used to repair puddles.

DynaBinder can also be added to neutral acrylic resurfacer to make crack repair glue for repair systems and also to fortify Dynaflex Acrylic Resurfacer and DynaColor Color Coating.

QUICK APPLICATION - SAVES TIME!

- ▶ Fast, permanent repair for low spots on tennis, pickleball and basketball courts, multi-sport play areas, and walkways.

NON-SHRINKING

- ▶ Deep bird baths can be filled in 1/4" lifts up to a depth of 1". DynaBinder will stay leveled and not shrink.

FAST SETTING PATCHES

- ▶ Will not pop out of asphalt.
