

STRIPE AID

Line Striping Tape Gap Filler

Stripe Aid is an acrylic latex-based coating that always requires Dynastripe be applied as a top coat. Stripe Aid is used to seal the gap between a textured, colored pavement surface and the tape applied to the surface, assuring a straight line free of bleeding.

STOPS FUZZY EDGES

- ▶ The sharpest, cleanest line possible, especially on textured, color coated surfaces.

NO SHOW

- ▶ Non-pigmented and non-glossy; won't show through when tape is removed..

EFFICIENT

- ▶ Eliminates the need for painting tape with color coat.

FAST DRYING

- ▶ Less lost time on the job.
